SHORTENED STATUTORY PERIOD OF RESPONSE	MAIL DATE	DELIVERY MODE
3 MONTHS	04/25/2007	PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

If NO period for reply is specified above, the maximum statutory period will apply and will expire 6 MONTHS from the mailing date of this communication.

Office Action Summary	Application No. 10/087,566	Applicant(s) FURO ET AL.	
	Examiner Jason L. Savage	Art Unit 1775	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 28 February 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 73-79,83-88,92-105,109-114 and 118-124 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) 73-79,83-88,93-105,109-114 and 119-124 is/are allowed.
- 6) ☒ Claim(s) 92 and 118 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 92 and 118 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ning et al. (US 5,965,193) in view of Boutin et al. (US 4,222,774).

Ning discloses an electronic circuit substrate made of aluminum ceramic composite material wherein an electronic circuit is formed on an aluminum surface of the aluminum ceramic composite material. The aluminum-ceramic composite material is made by directly solidifying an aluminum alloy on at least a portion of a ceramic substrate.

Ning does not disclose the metal layer comprises small amounts of Mg.

Boutin teaches an aluminum alloy for use in the production of the articles subjected to elevated temperature comprises 1.0-1.5% Si, less than 0.2% of Mg and 0.9-1.5% of Mn, Ni or more than 0.005% and Ni+ Fe+ Co is 0.8-2% (Abstract). Boutin also teaches that the aluminum alloys has improved mechanical characteristics during and after the aluminum alloys exposure to elevated temperature (col. 1, lines 1-25).

It would have been obvious to one of ordinary skill in the art to use the aluminum alloy as taught by Boutin in Ning's aluminum layer in order to have improved the mechanical characteristics during and after the aluminum layer exposure to elevated

temperature when the power module has large amount of heat build up during the operation process

Regarding claim 92, Boutin teaches the Mg content is less than 0.2%; however, the claim limitation recites the Mg content it not less than 0.2%. Absent a showing of how the insulating substrate would exhibit a material difference between the metal alloy containing less than 0.2% compared to the alloy containing not less than 0.2%, it would not provide a patentable distinction over the prior art. Specific claimed alloy, whose compositions are in such close proportions to those in the prior art that, prima facie one skilled in the art would have expected them to have the same properties, must be considered to have been obvious from known alloys, *Titanium Metals Corporation of America V. Banner*, 227 USPQ 773.

Regarding claim 118 although Ning discloses that the aluminum ceramic composite is suitable for use in power modules (col. 1, ln. 20-30), it is silent to the structure of the power module such as is claimed. However, the claimed power module structure including a metal base plate and semiconductor tip bonded to the metal alloy layers of the aluminum ceramic composite is a convention structure. It would have been within the purview of one of ordinary skill in the art to have used the aluminum ceramic composite of Ning in view of Boutin in any conventional power module structure with a reasonable expectation of success.

Response to Arguments

Applicant's arguments filed 2-28-07 have been fully considered but they are not persuasive.

Applicant traverses the rejection that the claim limitation in claims 92 and 118 that the Mg content is "not less than (emphasis added) 0.2%" whereas the prior art of Boutin teaches less than 0.2% of Mg are in such close proportions that prima facie one skilled in the art would have expected them to have the same properties. Applicant states that the composition of 100% aluminum and 0% Mg of comparative example 1 is in the range of less than 0.2% taught by Boutin and has a Vickers hardness outside of the claimed range. This argument is not persuasive since Applicant has not shown that there is a distinction between an aluminum alloy having a content of 0.199% Mg which is also within the range taught by Boutin.

Allowable Subject Matter

Claims 73-79, 83-88, 93-105, 109-114 and 119-124 are allowed.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within

Art Unit: 1775

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason L. Savage whose telephone number is 571-272-1542. The examiner can normally be reached on M-F 6:30-4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jennifer McNeil can be reached on 571-272-1540. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Art Unit: 1775

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
